

Petrotranz Platform Release - Version 5.2

CALGARY, AB, Canada (November 19th, 2015) – Petrotranz Inc. is pleased to announce that Petrotranz version 5.2 has been released on schedule. This milestone also marks our 42nd release through 7 years of continual re-investment.

The Petrotranz 5.2 release includes:

Petrotranz Data Exchange (PDX)

- APMC Shipper Balance Integration Module
 - Automated push of all crown and crown agent Shipper Balances into Petrinex
- PDX Integration Module
 - Complete PDX functionality is now available for Integrated Producers and smaller Terminal Operators
- Form C flow through to NOS Enhancements
 - Ability to add Form C data to NOS receipts (where applicable)
- Operational Notification - PDF Attachment and Subscription Enhancements
- New PDX Document Type – Contracted Commitment Reports

Crude Oil Transportation System (COTS)

- Flow Through Form A Enhancements
- Form A WIO Import Service Enhancements
- WIO View Enhancements

About Petrotranz Inc.

Petrotranz Inc. is a technology company that builds, deploys and manages secure, web-based industry solutions that automate and improve manual or inefficient processes in the Energy Industry. The commercial applications developed by Petrotranz are the Crude Oil Transportation System (COTS) and the Liquids Transportation System (LTS) which are utilized to manage transportation and logistical information related to the 3-month crude oil and liquids lifecycle.

In January 2014, Petrotranz launched the Petrotranz Data Exchange (PDX). PDX is a secure, web-based data exchange that makes volumetric and financial information available in an electronic format between relevant stakeholders (Terminal and Pipeline Operators, Shipper Marketers and Producer Operators). The Petrotranz Technology Platform is used by over 1100 companies managing over 97% of crude oil and liquids volumes in the Western Canadian Sedimentary Basin.
