

Petrotranz announces PetroNet as Silver TAP Partner

Transforming how energy information is exchanged

CALGARY, AB, Canada (August 10th, 2015) – Petrotranz Inc. is pleased to announce that PetroNet Systems is the first Production Accounting System Vendor Partner, to be recognized for their integration efforts with the Petrotranz Data Exchange (“PDX”). Silver Status is currently the second highest level of recognition that can be awarded to Petrotranz Technology Partners for their integration accomplishments.

With a large number of customers in the Canadian Oil and Gas Industry and progressive thinking, customer-focused management, PetroNet jumped when the option to integrate presented itself. Upon release of the key integration, Crude Oil Splits, feedback from mutual customers was immediate and very positive with one particular customer indicating that the new functionality removed hours from her monthly splits tasks. PDX is the first transformational system for the energy industry that allows disparate systems to communicate with each other and the first system that provides a common language and secure hub for transacting information between all energy stakeholders.

“Petrotranz is very excited to have PetroNet as a member of the TAP program,” says Dallas Smith, Vice President of Operations, Petrotranz Inc. “Working with such a progressive group that sees so much value in providing immediate efficiency gains to our mutual customers through real-time integration is what makes them an industry leader.”

Raj Abbi, President of PetroNet Systems, states, “We saw this as an opportunity to unify and enhance reporting capabilities of our mutual clients. Petrotranz’ data exchange was simple to understand and we were easily able to incorporate the technology into our application. We look forward to working with Petrotranz on other integration opportunities.

All risk associated with data re-entry for crude oil shipper and working interest owner splits is mitigated, improving the accuracy of information and the speed at which information is available to all stakeholders. This functionality has been available to PetroNet customers since early 2015.

About PetroNet Systems Inc.

PetroNet Systems LP (a Zedi Company) markets, develops and manages the PetroNet Production Accounting Application. PetroNet has over 150 clients, all accessing their production data thru PetroNet’s secure hosted environment. All application upgrades and database management is handled by PetroNet allowing clients to concentrate on their core business. PetroNet handles all government reporting requirements and intuitively manages all sales splits, revenue and royalty allocations. PetroNet is a subsidiary of Zedi Inc. who provides integrated services, applications, and technology to oil & gas

producers to help efficiently manage their production operations. Zedi's applications include Zedi Access, Vital field data capture and Measurement Schematics. Zedi's expertise in its applications (and related consulting services) helps producers increase revenue while reducing operating costs and ensuring regulatory compliance.

About Petrotranz Inc.

Petrotranz Inc. is a technology company that builds, deploys and manages secure web-based industry solutions that automate and improve manual or inefficient processes in the Energy Industry. The commercial applications developed by Petrotranz are the Crude Oil Transportation System (COTS), Liquids Transportation System (LTS), Petrotranz Data Exchange (PDX) and Petrotranz Quality Management (PQM). Petrotranz is utilized by over 1000 companies to manage the transportation and logistics of more than one million boe/d of crude oil, and a quarter of a million boe/d of liquids in the Western Canadian Sedimentary Basin.

Petrotranz also provides volumetric and financial management industry services and actively serves as the COLC Administrative Manager and the ITC Invoicing Contractor.
