CRUDE OIL TRANSPORTATION SYSTEM

Crude Oil Transportation System (COTS) is a secure online platform that provides Producers, Facility Operators and Shippers the capability to communicate and manage forecasts and actual delivery volumes for Crude Oil and Segregated Condensate through the submission / approval of industry standard forms

What makes COTS so great?

Automates Manual Processes : Forecast shipping volumes, capture production information and reconcile delivered quantities to complete and submit delivery volumes online each month

Leverages Standardized Data: Gain access to the most up-to-date reference data straight from the source

Exceptional Support: Need help? Get it fast with our support team as we offer a variety of support such as: Live Chat, Lunch and Learns and the Petrotranz University

What's in it for you?

USERS

- Efficiently create, submit and revise forms such as: Form As, Form Cs, Shipper Splits and Notices of Shipment
- Form Bs are created and submitted automatically whenever a Form A is revised and submitted
- Streamline the processing of your incoming forms by creating and managing eligible shipper lists and streams for each of your facilities

MANAGEMENT

- COTS keeps a historical record of every event that happens within the form submission/approval process allowing for effective audit compliance
- Access to standardized industry forms that seamlessly tie together the entire three-month reporting requirements
- Full integration and interfacing functionality between Crude Oil Marketing, Production Accounting and Facility Management systems

Integrate

Easily leverage system to system automated communication using industry standard data definitions and data schemas available through Petrotranz' Technology Adoption Program (TAP)

Modern Support

Fully supported on Google Chrome, Edge and Internet Explorer 11
